

Russian Economy Monitor

➤ Comprehensive data

Russian Economy Monitor (REM) contains the most comprehensive data on the economic development of Russia and its regions. The application is based on the data provided by the Russian Statistical Agency, but it can be tailored to your specific requirements by integrating other sources. REM views the following key socio-economic indicators by region:

- Gross Regional Economy Product ~ 34 indicators
- Industrial Production (Production Index, Manufacturers' Inventories, etc.) ~ 59 indicators
- Investment (Fixed Capital Investment, etc.) ~ 30 indicators
- International Trade (Exports and Imports, etc.) ~ 22 indicators
- Business Operations (Finance, Operating Profit/Loss, Business Profitability) ~ 9 indicators
- Prices (CPI, Total, Core, Food, Other Goods and Services, etc.) ~ 29 indicators
- Cost of Living (Personal Income, Personal Consumption Expenditure, etc.) ~ 62 indicators
- Employment (Civilian Labor Force, Civilian Unemployment Rate, Jobless Claims, etc.) ~ 78 indicators

- Demographics (Population and Population Growth, Age Distribution, Birth and Death Rates, etc.) ~ 49 indicators
- Social Welfare (Health Service, Education, etc.) ~ 184 indicators
- Public Safety and Crime (Number of Crimes Reported, etc.) ~ 22 indicators

➤ Updated information

Over 500 indicators are updated on a monthly basis. The data for November 2008, which became available in January 2009, include the following indicators: Import and Export, Birth Rate, Total Migration (rise/fall), Fixed Capital Investment, Small Business Turnover, Retail Trade Turnover, Industrial Production Index, Unemployment, Average Cash Income, etc. Over 1000 indicators are updated quarterly.

➤ Flexible analysis

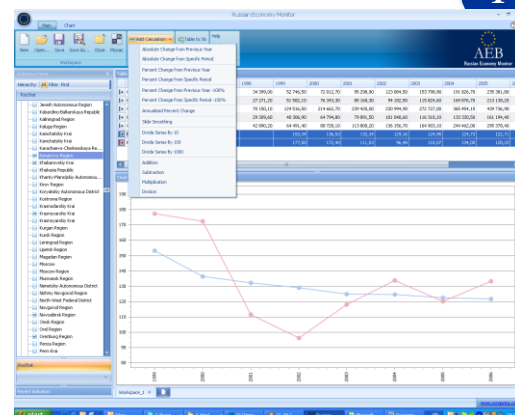

REM offers a wide range of analytical capabilities.

The application enables the user to:

- Identify Russia's economic strengths and weaknesses
- Analyze factors contributing to economic growth and estimate their impact on the economy
- Compare regions in terms of economic performance

Our advanced analytical tools allow you to do the following:

- Make reports using a variety of business graphics
- Visualize multi-dimensional data in table, map and chart form
- Make use of efficient filtering and highlighting tools to single out the data of your choice
- Analyze the different dimensions of data, e.g. absolute value, growth rate and accumulative value, over a period of time
- Save and print your results, or export them into Word, Excel and other formats

About PROGNOZ

PROGNOZ is an innovative software solutions partner and vendor. We specialize in the delivery of Business Intelligence solutions to a wide range of sectors, including agriculture, banking, energy, financial services, government, healthcare, tourism, transport, and academia. We are amongst only a few global vendors that provide very powerful mathematical features and advanced forecasting capabilities.

We have offices around the world, including Moscow, Washington, Brussels, Beijing and Kiev, and draw on nearly 20 years' experience. Originating with a core set of practical applications within academia, we have created a business that has over 600 employees, global customers and a powerful product road map, and is aimed at delivering new value to our increasing customer base and not simply following the lead of standard BI vendors.

PROGNOZ solutions help thousands of users, at organizations ranging from large corporations to government agencies and universities, to gain valuable insight into complex data and improve the efficiency of their operations. Our customers include:

- **International Organizations and Groups:** The International Monetary Fund, The World Bank, OECD
- **Government Institutions:** the Presidential Executive Office of the Russian Federation and its government ministries; the United States Department of Agriculture; Hawaii State Department;
- **Central Banks:** The Bank of Russia and the National Bank of Georgia
- **Large Enterprise Groups as well as Small and Medium-Sized Businesses:** Gazprom, the State Power Grid of China, COSCO (China Ocean Shipping Corporation), Syngenta, Bayer CropScience, American Express, BNSF Railroad
- **Media & Entertainment Networks:** CNBC (Consumer News and Business Channel)
- **Consulting companies:** Oxford Economics, Tourism Economics, Global Insight, Global Economic Consulting Associates, Select Greater Philadelphia, Beijing Forecast Information Tech.

In recent years PROGNOZ has ranked high in various ratings of IT companies, which testifies to its stability on the IT market. It ranked top among consulting companies in the Ural West Siberian region, as was announced in Expert Ural magazine. As a result of the IDC market research carried out in November 2008 PROGNOZ was acclaimed the best Business Intelligence vendor in Russia.

PROGNOZ is a certified Microsoft partner, Oracle business partner, and IBM partner.

About the Association of European Businesses (AEB)

2

The AEB is an independent non-commercial association funded by membership and sponsorship.

AEB membership is made up of enterprises and entrepreneurs from European Union (EU) member states and the European Free Trade Association (EFTA), which have business activities with and in the Russian Federation. These members form the AEB General Assembly (GA), which determines the association's overall strategy and policies.

The AEB was established in 1995 on the initiative of several European companies registered in the Russian Federation, Ambassadors of EU member states and Head of the Delegation of the European Commission to the Russian Federation.

AEB Mission Statement

The mission of the AEB is to represent and promote the interests of its Members by supporting them in doing business with and in Russia through quality lobbying, information support, and activities aimed at improving the Russian trade and business environment in conformity with internationally accepted business principles, as well as promoting integration and partnership between the European Union and Russia.
